

Consumption of electricity and natural gas in 2019 and 2020

Total electricity and natural gas consumption in 2020 was lower than total consumption in 2019. A significant decrease in total consumption was recorded in electricity, by 6.0 %, while the consumption of natural gas was only 0.7 % lower.

In the case of both energy products, we recorded an increase in the consumption of household customers, which can be attributed to the introduction of emergency measures in the country related to the COVID-19 epidemic, when many employees worked from home for a long time.

More detailed data by type of consumption can be seen in the table below:

Yearly consumption in GWh	Electricity			Natural gas		
	2019	2020	Index	2019	2020	Index
Transmission system	174	101	-41.7 %	5,478	5,382	-1.8 %
Closed distribution systems	1,745	1,440	-17.5 %	619	581	-6.1 %
Distribution systems	11,400	10,977	-3.7 %	3,555	3,621	1.9 %
- of this Business consumption	8,014	7,418	-7.4 %	2,421	2,446	1.0 %
- of this Household consumption	3,386	3,559	5.1 %	1,134	1,175	3.6 %
Total consumption	13,319	12,518	-6.0 %	9,652	9,584	-0.7 %

Consumption of electricity and natural gas by type of consumption in 2019 and 2020 can also be seen in the following figures:
